

# EPA's Regulatory Train Wreck

Currently Estimated Regulatory Timeline for Coal-Fueled Power Plants and Commercial Industrial Boilers (as of January 2011)

## Current US operating power generation capacity by fuel and by initial operating date (as of year-end 2009)

Excludes capacity in operation before 1950.

Hydro is run-of-river and pumped storage; it excludes tidal, etc. Coal includes lignite and refined coal but does not include petcoke, black liquor and the like. Gas does not include propane or syngas. Oil includes residual, distillate and "other" oil, which includes waste oil products like butane, sludge oil, tar oil and propane.
